OFFICE OF THE SECRETARY

**Re: Amendment of Section 73.202(b)  
Table of Allotments, FM Broadcast Stations  
(Arnoldsburg, West Virginia)  
Reservation Showing, Roane County Board of Education  
No. 448**

Dear Ms. Dortch:

Transmitted herewith, on behalf of Roane County Board of Education, is an original and four (4) copies of its Petition for Rule Making, which requests the allotment of Channel 264A to the community of Arnoldsburg, West Virginia.

Please contact the undersigned in the event the Commission has any questions with respect to this rule making petition.

Sincerely,

  
Aaron P. Shainis  
Counsel for  
ROANE COUNTY BOARD OF EDUCATION

	)	
Amendment of Section 73.202(b)	)	MM Docket No. _____
Table of Allotments	)	RM- _____
FM Broadcast Stations	)	No. 448
(Arnoldsburg, West Virginia)	)	

To: Mass Media Bureau

**PETITION FOR RULEMAKING**

Roane County Board of Education (“Roane County”), by its attorneys, and pursuant to Section 1.420 of the Commission’s rules, hereby requests that the Commission amend its Table of Allotments by amending Section 73.202(b) of rules to reserve vacant Channel 264A at the community of Arnoldsburg, West Virginia as a noncommercial educational (“NCE”) allotment.

In support of its position, Roane County submits the following:

The Commission in its *Second Report and Order in Reexamination of the Comparative Standards for Noncommercial Educational Applicants*, 18 FCC Rcd 6691, 6703-07 (2003) (“*NCE Second Report and Order*”), extended its revised NCE reservation policy to existing, vacant FM allotments for which it had initiated an allocation proceeding prior to August 7, 2000, the effective date of its standards. Petitioners were expected to follow the reservation policy set forth in the *NCE Second Report and Order*.

As the attached engineering makes clear, Roane County has satisfied the two criteria required by the Commission’s *NCE Second Report and Order*. Roane County has established the need for a new NCE service in that it would provide a first or second NCE service to at least

10% of the population within its proposed service area and that population is over 2000 persons. Also, it has provided a complete technical preclusion showing. Therefore, having satisfied the two Commission criteria, it has established that the Commission previous allotment of Channel 264A to the community of Arnoldsburg, West Virginia should be reserved.

Accordingly, having shown the need for an NCE service at Arnoldsburg and satisfied the FCC's established criteria, Roane County respectfully requests that the Commission amend its Table of Allotments to allot Channel 264A at Arnoldsburg, West Virginia as a reserved channel.

Respectfully submitted,

ROANE COUNTY BOARD OF EDUCATION

### Engineering Statement

This firm has been retained by the Roane County Schools ("RCS") to determine their eligibility to reserve an FM channel for non-commercial educational use, Channel 264 in Arnoldsburg, WV. The NCE Second report and Order outlines the steps required in order for an applicant to show eligibility for a commercial channel.

The first requirement is to demonstrate that there is a relative need for a new NCE service. The proposed signal coverage contour (60 dbuv/m) was determined and plotted. A search of the FCC FM database was performed to determine what other FM non-commercial facilities are presently licensed that could provide service to the area proposed by RCS. The search showed that there was an area in the proposed facility that would provide first service.

Based on the 2000 U.S. Census of Population, the number of persons enclosed by the proposed 60 dBu coverage contour is 24,156 persons. The population count was made through the employment of a computer program containing a database including the geographic coordinates of the centroids of population groupings. A computerized integration program determined this area. The area of the proposed facility is 2,330 square kilometers. The area of first service was determined to be 539 square kilometers.

The total population of people that are predicted to get first service with the RCS proposal is 16% which satisfies the first showing of need that is required by the Second Report and Order.

The next showing required by the Second Report and Order is that technical preclusion showings be performed. The first study was centered on the proposed community of license (Site Map) with a power of 6,000 watts and a center of radiation of 100 meters

HAAT which represents a maximized facility. This study demonstrates that no NCE channel is available. The results of this preclusion study are contained in Table 1.

The preclusion study was repeated using a power output of 100 watts which represents a minimal facility. The results of this study demonstrate that no NCE facility can be proposed that is fully compliant with current Rules. Table 2 has the results of this preclusion study.

The preclusion study was repeated at equally spaced locations ( $0^\circ$ ,  $90^\circ$ ,  $180^\circ$  and  $270^\circ$ ) located one the circle centered on the proposed community of license at a radius of 27 kilometers which is one kilometer less than the predicted 60 dbuv strength signal contour of a maximized class facility. Table 3 contains the result of this study.

**Summary**

Based on the results of the studies performed RCS has demonstrated that it is technically precluded from using a reserved channel and provides NCE radio first service to at least 10 percent of the population within the 1 mv/m contour of its proposed station on channel 264 in Arnoldsburg, WV.

Respectfully Submitted,

Garrett G. Lysiak, P.E.
